Subject: RE: proposal to cancel today's weekly reg meeting at 2:30

Actually – if we can do a quick meeting, it might be good to just run through these things quickly.

Subject: proposal to cancel today's weekly reg meeting at 2:30

Laura and Kevin,

I don't think we have that much to cover at today's weekly reg, so I'm proposing that we cancel the meeting. Perfectly willing to meet if that is what you prefer.

The key things on our radar are:

1. OP General on Friday. Draft notes for that below, in the same format as last time.
2. Tiering of 7 new TSCA actions. We have agreement with OCSPP that most of them will be Tier 3 and the two actions we discussed last week will be Tier 2 (Risk Prioritization Procedural Rule and Risk Evaluation Procedural Rule). Supplemental tiering forms are on Kevin's chair for approval.
3. Several actions may come through for signature or OMB transmittal later this week or early next week, and we will send blurbs with the new items.

Draft Notes for OP general on Friday

Regulatory updates since our last meeting in late June

The TAR, Regional Haze Guidance, and Landfills have all been signed.

Many of the rules that were at OMB when we talked in June, or were scheduled to go to OMB in July, are now there under review. We have a total of 15 rules there now, which is a relatively high number. For reference, a list of the rules currently at OMB follows below. Two of them have been at OMB for more than 120 days.

Possible items to mention at the meeting

MS4 General Permit Remand Rule is now projected to go to OMB in mid-September, compared to late August when we met last month. The NDPES Construction General Permit is projected to go to OMB in mid-October, making signature of the final rule uncertain assuming 90 day review.

The 2018 Vessels General Permit and the Great Lakes CSO Public Notice are both new additions to our list of actions projected to go to OMB this year, both in mid-October.

Two TSCA 6(a) actions, TCE Use in Vapor Degreasing and NMP and Methylene Chloride, are both now projected to go to OMB in late August, a delay of a month. Current schedules for both rules assume 90 day OMB review.

Actions currently at OMB for review

Action Title	Days at OMB (projected to Friday)
TCE Use in Dry Cleaning and Aerosol Degreasing	3
Interstate Transport Rule for the 2008 Ozone NAAQS	17
Protection of Stratospheric Ozone: Update to the Refrigerant Management Requirements under Section 608 of the Clean Air Act	23
Control Techniques Guidelines for the Oil and Natural Gas Sector	32
Exceptional Events Implementation Guidance -- Supplemental re Wildfire-related Events	36
Treatment of Data Influence by Exceptional Events -- Rule Revisions	36
Federal Implementation Plan (FIP) for Existing Oil and Natural Gas sources; Uintah and Ouray Indian Reservation in Utah	38
Hazardous Waste Export-Import Revisions Rule	44
Hazardous Waste Generator Improvements Rule	50
Greenhouse Gas Emissions and Fuel Efficiency Standards for Medium- and Heavy-Duty Engines and Vehicles - Phase 2	57
Protective Action Guidance (PAG) for Radiological Incidents	72
Renewables Enhancement and Growth Support Rule	82
Implementation Rule for 2012 PM2.5 NAAQS -- SIP Requirements	87
Revisions to the Prevention of Significant Deterioration and Title V Greenhouse Gas Permitting Regulations and Establishment of a GHG Significant Emissions Rate	123
Guidance Document on PM2.5 and Ozone Significant Impact Levels (SILs) for Implementing the Prevention of Significant Deterioration (PSD) Program	128
